

## Reading

### Read the text and choose the correct answer. Choose A, B or C.

Inventions are important because they help people understand how things work and make daily life easier. Every invention has a clear **purpose** and a special **function**. To **invent** or **create** something new, a person begins with an idea. After that, a detailed **design** is made, and a careful **process** is followed to build it.

Most inventions use a simple **mechanism** to operate. For example, when a **button** is pressed, the machine starts and uses **power**. Many devices need **electricity**, and it must be carefully controlled to keep the invention safe.

Some inventions were invented many years ago, but they have **changed** the world. They help people **communicate**, work faster, and live better. Today, modern inventions are created to **improve** life and solve problems. Good **design** and clear **purpose** help inventions succeed and make a difference in the world.

### Choose the correct answer.

- What is the main idea of the text?**
  - How inventions work and improve life
  - How inventions are advertised
  - How inventions are broken
- What is needed before you create an invention?**
  - Electricity
  - An idea
  - A button
- What helps a machine start working?**
  - A button
  - A purpose
  - A design
- Why must electricity be controlled?**
  - To save money
  - To make the invention safe
  - To change the process
- What do inventions help people do?**
  - Sleep more
  - Communicate
  - Stop working
- What have inventions done to the world?**
  - Changed it
  - Stopped progress
  - Made it smaller
- What does the word "mechanism" mean in the text?**
  - A system of parts that makes something work
  - The price of something
  - The color of something
