

Part 3: Reading

Read the text carefully and choose the correct answer:

A) Last month, our class went on a school trip to a coastal town. We had to wake up early and wait at school for almost an hour before the bus arrived. Some students did not feel well because they were tired, but everyone was still very excited.

B) Our first stop was a marine park and aquarium. We watched trainers feed dolphins, and the animals looked very friendly. A guide began to show us different sea creatures and explained how marine life is studied in science. Some students were surprised by the size of a huge fish, while others felt a little scared when they saw a strange sea animal that looked almost dangerous. However, the guide explained that it was completely safe.

C) After lunch, we visited a small museum about space. We learned that some stars are more than a thousand times bigger than Earth and very far away. Our teacher told us this information would help us with our project about the universe and different ages of the Earth.

D) The next day, we went on a short safari outside the town. We saw a colorful parrot sitting on a tree and tasted fresh mango, which was sweet and soft. Some students tried kayaking, while others watched a helicopter flying above us in the golden sunset. It felt like a wonderful dream.

E) Before returning home, we bought local souvenirs for our families. Although the trip started early and some moments seemed terrible because we were tired, it became one of the most unforgettable experiences of our lives.

1. The main idea of the passage is:

- A school trip that included learning, adventure, and exciting experiences
- How to study science in a classroom
- Why helicopters are dangerous

2. The main idea of paragraph (B) is:

- Students were too tired to enjoy the trip
- The visit to the marine park and aquarium
- Buying souvenirs in town

3. The dolphins were being fed by:

- students
- teacher
- trainers

4. The teacher talked about stars and the ages of the Earth:

- To prepare students for their science project
- To make them scared of space
- To explain how helicopters fly

5. The guide said the strange sea animal was safe.

- True
- False
- Not Given

6. The students travelled by helicopter during the safari.

- True
- False
- Not Given

7. Some students were scared at the aquarium:

- Because the guide shouted at them
- Because some sea animals looked strange and dangerous
- Because they felt well

8. We can understand that the trip overall was:

- completely terrible from beginning to end
- improved as the day continued and became enjoyable
- only about buying souvenirs

9. The writer's opinion about waking up early for the trip:

- It was unnecessary and ruined everything
- It was difficult, but worth it for the experience
- It was more exciting than the safari

10. The writer's overall opinion of the trip was:

- a wonderful and unforgettable experience
- dangerous and should not be repeated
- boring and uninteresting
