

Name:

Class: 4/.....

Part 3: Read the text and choose the correct answer. Choose A, B or C.

Building Through Time

Long ago, people lived in simple houses, but they also built very large structures. In Egypt, people made the pyramids using heavy stone. In China, workers worked for many years to finish the Great Wall. They used stone and brick to make it very strong.

Later, engineers wanted to build higher, so they designed the first skyscrapers. These tall buildings needed a different design. Builders used strong metal for the frame and glass for the windows. In France, the Eiffel Tower is a famous structure made of metal that many people visit. Today, scientists use computers to help them build even more amazing structures. These buildings are special because they show how people's ideas changed over time.

Example	<p>Where did people build the pyramids?</p> <p>A. In Egypt B. In China C. In France</p>	3	<p>In the text, what does the word "designed" mean?</p> <p>A. To break something. B. To plan how to make something. C. To go for a walk.</p>
1	<p>What material did builders use for skyscraper windows?</p> <p>A. Stone B. Metal C. Glass</p>	4	<p>What is the main idea of this text?</p> <p>A. China is a very large country. B. People only use stones to build houses. C. People built different amazing structures over time.</p>
2	<p>How did workers make the Great Wall of China strong?</p> <p>A. They used stone and brick. B. They used only wood. C. They used paper and glue.</p>	5	<p>Which of the following is NOT mentioned as a structure in the text?</p> <p>A. The pyramids B. Burj Khalifa C. The Eiffel Tower</p>
