

Write True or False

1. Two vertical angles may also be adjacent angles. \_\_\_\_\_
2. The complement of an acute angle is an obtuse angle. \_\_\_\_\_
3. Two vertical angles may be complementary angles. \_\_\_\_\_
4. When two lines intersect and form  $90^\circ$  angle, then these lines are perpendicular \_\_\_\_\_
5. The difference between the measures of the supplement and the complement of an angle is always  $90^\circ$ . \_\_\_\_\_

A

B

- \_\_\_\_\_ 6. Points that do not lie on the same plane.
- \_\_\_\_\_ 7. Part of line consisting two endpoints and all points that lie between them
- \_\_\_\_\_ 8. Any line, segment, ray or plane that intersects a segment at its midpoint.
- \_\_\_\_\_ 9. Points that line in the same plane.
- \_\_\_\_\_ 10. Figure formed by two rays having a common endpoint.
- \_\_\_\_\_ 11. Segments that have the same measure

- a. congruent line segments
- b. coplanar points
- c. noncollinear points
- d. bisector of a segment
- e. intersection of 2 figures
- f. line segment
- g. angle
- h. collinear points
- i. noncoplanar points

E. Write the word/s that completes the following postulates.

12. Through any two points, there exist exactly \_\_\_\_\_ line.
13. If two planes intersect, then their intersection is a \_\_\_\_\_.
14. Through any 3 noncollinear points, there exist exactly one \_\_\_\_\_.
15. \_\_\_\_\_ points are points that are coplanar and lie on the same line.
