keep up with relate to remotely touch undoubtedly scale

In recent years, the widespread use of smart technology has led to radical innovations that have completely altered modern life. In my opinion, the most significant ones ¹ _____ relate to _____ communication, access to information, and automation.

Firstly, smart devices like smartphones have revolutionised the way people connect with each other. These gadgets offer an array of communication options, such as video calls and text or voice messages, enabling users to stay in ² _____ touch _____ with friends or family in real time, regardless of distance. Additionally, social media applications have allowed people to share **their** ideas and experiences with a global audience, and even build communities around common interests.

What is more, thanks to smart technology, information has become more accessible than ever before. With search engines and AI programs, it is now possible for every individual to be instantly informed about any topic and ³ _____ keep up with _____ current events or the latest trends. **These** types of software have also made smart technology an essential tool for learning since they provide students of all ages with access to educational resources from any location at any time.

Finally, smart technology has facilitated the automation of various processes in numerous fields, **which** has simplified everyday life on a large ⁴ _____ scale _____. One such example is the advent of smart homes, where lighting, appliances and security systems can be controlled with a simple voice command or a few clicks on a smartphone. **This** has not only enabled householders to manage their domestic devices ⁵ _____ remotely _____, but has also freed them from tedious chores, such as vacuuming or doing the laundry, offering them time to focus on more interesting activities.

To conclude, smart technology has ⁶ _____ undoubtedly _____ transformed many aspects of people's lives. However, I consider the most important changes to have occurred in the areas of communication, information accessibility, and automation as they have opened up new opportunities and made many daily tasks less complicated.
