Read the passage and decide if the statements are True or false. Choose the correct answers for the last 2 questions.

Nutrients in food are essential for our health and well-being. The main nutrients include carbohydrates, proteins, fats, vitamins, minerals, and water. Carbohydrates give us energy, while proteins help build and repair muscles. Fats are important for energy storage and brain function. Vitamins and minerals support our immune system and overall health. For example, vitamin C helps fight infections, and calcium strengthens bones. Water is crucial for hydration and proper body function. A balanced diet with a variety of nutrients helps keep our bodies healthy, so it is important to eat a wide range of foods every day.

15. Carbohydrates provide energy to the body. _____
16. Proteins are mainly used for energy storage in the body. _____
17. Vitamin C helps to fight infections. _____
18. Fats are not important for brain function. _____
