

Lesson 4: Using division to solve problems

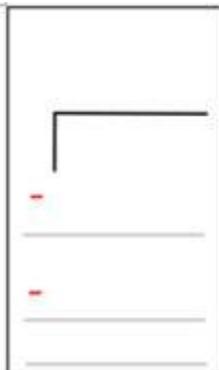

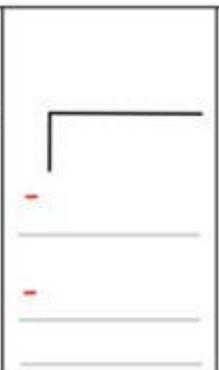

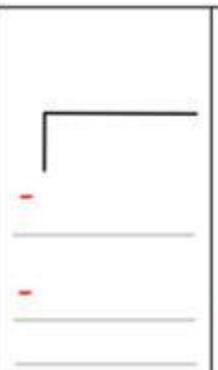

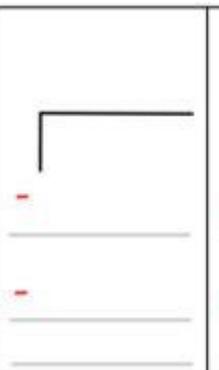

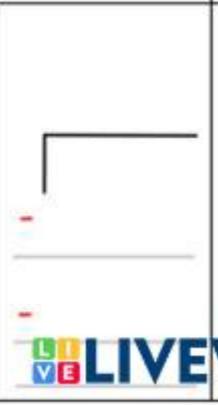

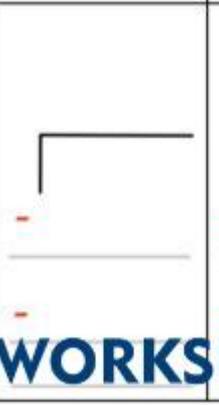

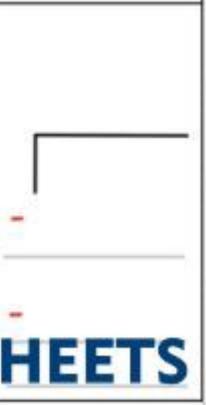

Number

- Estimate and divide 2-digit numbers by 1-digit numbers to solve problems

- 1** a A farmer collects 24 eggs. He puts them in boxes of 6.
How many boxes does he fill?
- b How many boxes will he fill if he collects 36 eggs?
- c How many boxes will he fill if he collects 42 eggs?
- d How many boxes will he fill if he collects 54 eggs?
- 2** a 24 learners are going on a school trip. They are travelling in minibuses. 8 learners are allowed on one minibus.
How many minibuses are needed?
- b How many are needed if there are 32 learners?
- c How many are needed if there are 48 learners?
- d How many are needed if there are 64 learners?
- 3** Hiro and Kam pick 49 flowers. They put 3 flowers in each vase.
How many vases do they use?
- How many flowers are left?
- How did you work that out?
