❖ Unscramble the following adjective words.

Reading

- ❖ Read this text and decide if the following sentences are True (T), False (F) or Doesn't say (DS).

WILD ANIMALS AROUND THE WORLD

Wild animals live in many different places on Earth. Some animals live in hot jungles, some in cold mountains, and others in dry deserts. Every animal is special, and many animals are different in size, speed, and strength.

The **cheetah** is one of the fastest animals on land. It is faster than the lion and the tiger. However, the lion is stronger than the cheetah. Lions usually live in groups called prides, but cheetahs often hunt alone.

The **elephant** is the biggest land animal in the world. It is heavier than the giraffe and much bigger than most other animals. Elephants are also very intelligent. Some scientists believe they are more intelligent than many other animals.

The **giraffe** is the tallest animal on land. Its long neck helps it eat leaves from very tall trees. Giraffes are taller than elephants, but they are lighter.

The **polar bear** lives in very cold places like the Arctic. It is one of the strongest and most dangerous bears in the world. Polar bears are bigger than most other bears and are excellent swimmers.

The **dolphin** lives in the ocean. Many people think dolphins are the most intelligent sea animals. They are friendlier than sharks and often live in groups.

Wild animals are important for nature. Many scientists say protecting animals and their habitats is one of the most important things people can do for the planet.
