Listen and fill in each blank with ONE word.

At what age should a child learn to use a computer?

Opinion	Reasons
Some educators: "the **(1)** ………………, the **(2)** ………………"	1. In modern society, computer skills are a **(3)** …………………… **(4)** ……………………… for every child. → Children should start using computers while they are in **(5)** ……………………… 2. Computers can make learning **(6)** ………………… and more **(7)** ……………………… → Computers can show **(8)** ……………………, print **(9)** ………………… and say **(10)** ………………… during a lesson.
The other educators: Computers could have a **(11)** …………………… effect on the mental and physical development of children.	1. Children do not use their **(12)** ……………………… enough. 2. Children who play alone on a computer don't learn how to share or **(13)** ……………………… with other children. 3. Children who **(14)** ………………… for a long time or use a computer **(15)** ………………… too much can develop problems with various parts of their **(16)** …………………
Solution: Children should use computers only for a short time each day. If they use computers for **(17)** ………………… **(18)** ………………… a day, they still have plenty of time for the other activities.
