

1. Complete the definitions using the words in the word bank.

**Speed** is the rate at which an object \_\_\_\_\_. It is a \_\_\_\_\_.

**Velocity** is the rate at which an object \_\_\_\_\_ its \_\_\_\_\_. It is a \_\_\_\_\_.

<i>changes</i>	<i>moves</i>	<i>covers</i>	<i>position</i>	<i>distance</i>
	<i>vector</i>	<i>scalar</i>	<i>displacement</i>	

2. Drag and drop the symbols to complete the diagram showing the relationships between distance, time and speed. Complete the formula.

 The SI unit of speed is 
**Speed =** \_\_\_\_\_

3. Solve the tasks using the formula above.

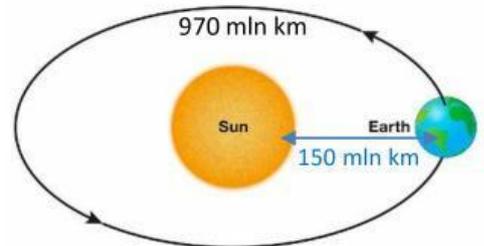

a) How fast does a person on Earth moves with it around the Sun?

Use the diagram to find the distance needed.

 Time, days: 

 Distance, km: 

 Speed, km/day: 

 Speed, m/s: 

b) Find the speed and the velocity of the skier using the diagram below. Show your work!

**Write final answers using SI units!**

**Show your work here.**

Distance =

Time =

Speed =

Velocity =

**Final answer**

 Average speed: 

 Average velocity:
