

Name: _____

12.1 Understand Tenths and Hundredths

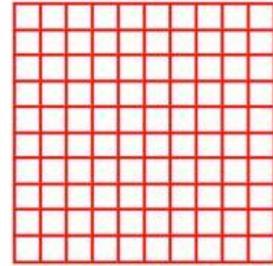

Step 1: Shade the fraction bars to represent the fraction:

$$\frac{6}{10}$$

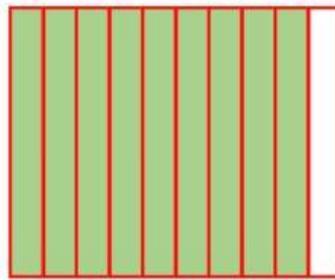

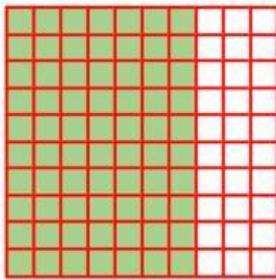

$$\frac{40}{100}$$

$$\frac{90}{100}$$

Step 2: Which fraction does the grid represent?

Step 3: Convert from tenths to hundredths or hundredths to tenths:

$$1. \frac{40}{100} = \frac{\square}{10}$$

$$3. \frac{9}{10} = \frac{\square}{100}$$

$$2. \frac{7}{10} = \frac{70}{\square}$$

$$4. \frac{60}{100} = \frac{6}{\square}$$
