3. A. yards	B. roofs	C. gardens	D. doors
4. A. is	B. be	C. are	D. was
5. A. polluted	B. polluting	C. pollute	D. non-polluting

Ex 6. Read the following passage and mark the letter A, B, C or D to indicate the correct answer to each of the questions.

The natural environment includes all natural resources that are necessary for life: the air, the oceans, the Sun and the land. Because they are vital for life, these resources must be protected from pollution and conserved. Ecologists study their importance and how to use them carefully. According to ecologists, resources are divided into two groups: renewable and non-renewable. When a resource is used, it takes some time to replace it. If the resource can be replaced quickly and easily, it is called renewable. If it cannot be replaced quickly and easily, it is called non-renewable. For example, grass for animals is a renewable resource. When cows eat the grass, the resources are used. If the soil is fertilized and protected, more grass will grow. Coal, however, is non-renewable because it takes millions of years to make coal. All fossil fuels are nonrenewable resources.

1. The natural environment consists of _____.
A. the air and the land B. the oceans & the Sun
C. the Sun and the land D. all natural resources

2. According to ecologists, there are_____ resource groups.
A. two B. three C. four D. five

3. If the resource can be _____, it is called renewable.
A. burnt quickly B. replaced quickly
C. divided property D. used quickly

4. According to the passage, coal is non-renewable because it takes _____ to make coal.
A. hundreds of years B. thousands of years
C. million of years D. billion of years

5. What is the CLOSEST meaning to the word **"vital"** in the passage?
A. optional B. essential C. harmful D. depleting

6. What is the OPPOSITE meaning to the word **"renewable"** in the passage?
A. temporary B. non-renewable C. replaceable D. sustainable
