Lesson 7-4: Multiple Representations

Name: _____ **Grade: 6**

Check your understanding:

1. A company sells guided kayaking tours. The company charges costs $20, and each patch costs $4. Represent the relationship between the number of patches bought p and the total cost c of a quilt with an equation, a table, and a graph.

   a. Represent the relationship with an equation.

   c = 4p + 20 **c = 20p + 4**

   b. Represent the relationship with a table.

Number of Patches, p	Total Cost ($), c
1	
2	
3	
4	

c. Represent the relationship with a graph.
