

- 1 One of the recent problems in Australia is the loss of habitat for several species of due to human activity.
- 2 Another problem that Australia is currently facing has to do with
- 3 Another problem in Australia is that they grow single-crop plants, such as, which is not beneficial for animals.
- 4 Humans generally ignore efforts to protect animals because their opinions are influenced by the
- 5 Humans generally ignore efforts to protect animals and they are even less concerned about smaller animals such as
- 6 The only way that humans can be encouraged to protect animals is through
- 7 Humans feel that protecting animals is disadvantageous because they are
- 8 One of the main reasons why extinction has to be prevented is the fact that the ecosystem needs to be to remain stable.
- 9 There are many reasons why we must prevent extinction, and one of them has to do with disorders in the
- 10 Some species have been successfully nursed back to health by and other scientists.

- 1 The layout of the products at the supermarket should consider the between the aisles.
- 2 The people responsible for the product layout at supermarkets should take the in consideration.
- 3 Product layout at supermarkets will not be successful if the organisation of items is
- 4 Supermarkets should find out the most way to arrange the layout of the products they carry.
- 5 Customers need to select the products that they want and need to buy.
- 6 Supermarket attendants should lay out the small items that they sell in
- 7 Supermarkets in general become a right before and after the rush hours.
- 8 Slow-moving products should be placed at the end of the
- 9 Expensive products should be placed in the middle of the
- 10 Profitable products like chocolates and flowers should be placed

- 1 Girolamo Benzoni noted in his book, *History of the New World*, that the fruit was called “cacahuate” was used as in the 16th century.
- 2 In the 17th century, people started processing cacahuate as chocolate.
- 3 In the 18th century, the American started adding to chocolate.
- 4 In the 19th century, researchers discovered that chocolate had an impact on a
- 5 Based on statistics, the top chocolate export country is
- 6 People discovered how to turn the liquid into, giving birth to the chocolate bar.
- 7 Chocolates are made in factories in different parts of the world and are in shops everywhere.
- 8 Manufacturers prefer to have the done in Africa because the cost is low.
- 9 The production and manufacturing of chocolate is important to the local of Africa.
- 10 The chocolate factory chose a site that was near the and they intend to stay there for good.

- 1 In fossil protection, the first kind of done is rapid burial in water bodies.
- 2 The second kind of fossil protection the fossil size and form.
- 3 For fossils to be protected, they need to be rapidly in water bodies.
- 4 When buried in the water, fossils become filled inside with
- 5 It is common to find some fossils in shops and museum
- 6 Fossils can be bought or purchased but the bigger ones are quite
- 7 The function of the is to indicate the type of rock the fossil is wrapped in.
- 8 The function of the notebook and pen is, of course, to fill in the for record purposes.
- 9 The function of the camera is, obviously, for
- 10 The function of the compass is to locate

- 1 The Bodiam Castle was built by Sir Edward Dalyngrigge in the first century years ago.
- 2 There was evidence that oyster were used as currency and they also recovered a single scallop valve that dated around the 19th century.
- 3 They discovered possessions of the which included coins, glassware, pottery, bronze figurines, bricks and tiles.
- 4 It was found that the people who lived there around a stream.
- 5 One of the economic activities at the time was development for the construction of buildings.
- 6 Many that were used for trading have been discovered during the excavation of the site.
- 7 The archaeologists and excavators also found at the site.
- 8 However, the architect was concerned about the which is the evidence for the existence of Roman villas.
- 9 According to the archaeologists, the represented the ancient cultural and economic significance of the area.
- 10 The other things that were recovered in the area were fragments of a and coins.

- 1 Jupiter's volume is 1000 times more than that of
- 2 There are 3 Stars that are brighter than Jupiter.
- 3 People can see Jupiter with the use of a and even the naked eye if one knows when and where to look.
- 4 Jupiter's moons were named after Galileo Galilei's in 1610.
- 5 The most distinctive characteristic of Jupiter's Io moon is that it has over 400 active
- 6 The reason why Jupiter's Europa moon cannot support life is because it is
- 7 Another reason why there are no living things on Jupiter's Europa moon is because its is covered with water-ice crust.
- 8 A characteristic feature of Jupiter's Ganymede moon is its bulging middle that is about 3 kilometres high and
- 9 Another characteristic of Jupiter's Ganymede moon is that its iron core produces a that becomes embedded in Jupiter's own magnetic field.
- 10 Jupiter's Callisto moon is heavily cratered, but a few of the small craters indicate a of current surface activity.

- 1 It is assumed that ideas about vertically stacked homes with for vertical farms existed since the 1900s.
- 2 The concept of vertical farming came about due to the need to reduce energy costs from for transporting foods to consumers.
- 3 The advantage of vertical farms is that it will help increase
- 4 However, having the proper in a vertical farm is also a necessary.
- 5 The disadvantage to vertical farms is that it could lead to the loss of
- 6 Another possible disadvantage is due to loss of nutrients.
- 7 Vertical farms have conditions optimal for crop growth all the time compared to farming at the mercy of weather, soil, pests and
- 8 If vertical farms are created, no crops would ever fail due to severe weather events, such as erosion caused by
- 9 Sunshine at any spot is always intermittent, so is deemed by many as an unreliable source of energy.
- 10 To maintain the good health of plants grown indoors, and air circulation must be very precisely controlled.

- 1 The collapse of the bridges was viewed as a disaster caused by technical and related to design and maintenance.
- 2 All three major accidents recorded in history involved the
- 3 The bridge in Scotland was destroyed in 1879 because of the effect of the
- 4 The bridge in Canada collapsed in 1907 because of its
- 5 All three bridges collapsed due to the use of a kind of sugar to hold parts in place.
- 6 The sugar sweeteners were kept in a at an undisclosed factory.
- 7 The of the bridge collapse is still difficult to calculate.
- 8 The reason cited for the accident was insufficient
- 9 The engineers knew that would cause the bridges to collapse.
- 10 Constructing and operating the bridges requires a and official certifications.

- 1 There has been a in the number of night shift workers, currently reaching 10,000.
- 2 Shift work creates a misalignment on our which causes difficulty in falling asleep.
- 3 The human internal clock enables people to tell the difference between
- 4 Weekend and night shift workers have a legal right to be paid for working shifts which can be viewed as
- 5 The lack of sleep endured by night shift workers is not good for the
- 6 All of these reasons could in night shift workers.
- 7 Lack of sleep at night affects the, therefore the performance of shift workers.
- 8 Another example of a disadvantage to night shift workers involves, such as the inability to have a normal social life.
- 9 Irregular working hours affect relationships and can lead to problems that may ruin
- 10 Relationships among friends or can also be negatively affected by irregular working hours.

- 1 Physical education used to play a in traditional education.
- 2 Nowadays, children prefer for pastime, such as watching TV or playing computer games.
- 3 The government has started introducing and encouraging schools to engage children in more physical activities.
- 4 The government has decided to focus on children's physical activities in order to help them develop their
- 5 Other countries that conducted a similar research include France,
- 6 However, opponents say there is a to paying too much attention on physical education.
- 7 On the other hand, proponents argue that physical exercise not only improves children's behaviour, but also their
- 8 Research has shown that PE can improve children's behaviour and concentration, as well as their
- 9 Physical education helps improve intelligence because it increases to the brain.
- 10 To conclude, it may be that PE is the to making children smarter and better overall performers.
