

Subtraction of 3 Digit Numbers by Using the Breaking Down Method

Here is an example of subtracting by using the breaking down method:

$$448 - 339$$

Step 1: First, we subtract the hundreds.

$$448 - 300 = 148$$

Step 2: Then, we subtract the tens from the remaining part of the sum.

$$148 - 30 = 118$$

Step 3: Finally, we subtract the units from the remaining part of the sum.

$$118 - 9 = 109$$

Now complete these subtraction sums using this method:

1. $878 - 619$

3. $286 - 149$

2. $892 - 473$

4. $376 - 157$

5. $852 - 573$

11. $627 - 392$

6. $572 - 267$

12. $586 - 487$

7. $653 - 154$

13. $959 - 743$

8. $349 - 257$

14. $931 - 491$

9. $607 - 397$

15. $573 - 129$

10. $819 - 622$

16. $672 - 419$

17. $562 - 487$

19. $814 - 752$

18. $486 - 381$

20. $946 - 297$

Subtraction of 3 Digit Numbers by Using the Breaking Down Method

Memorandum

1. $878 - 619$

Step 1: $878 - 600 = 278$

Step 2: $278 - 10 = 268$

Step 3: $268 - 9 = 259$

2. $892 - 473$

Step 1: $892 - 400 = 492$

Step 2: $492 - 70 = 422$

Step 3: $422 - 3 = 419$

3. $286 - 149$

Step 1: $286 - 100 = 186$

Step 2: $186 - 40 = 146$

Step 3: $146 - 9 = 137$

4. $376 - 157$

Step 1: $376 - 100 = 276$

Step 2: $276 - 50 = 226$

Step 3: $226 - 7 = 219$

5. $852 - 573$

Step 1: $852 - 500 = 352$

Step 2: $352 - 70 = 282$

Step 3: $282 - 3 = 279$

6. $572 - 267$

Step 1: $572 - 200 = 372$

Step 2: $372 - 60 = 312$

Step 3: $312 - 7 = 305$

7. $653 - 154$

Step 1: $653 - 100 = 553$

Step 2: $553 - 50 = 503$

Step 3: $503 - 4 = 499$

8. $349 - 257$

Step 1: $349 - 200 = 149$

Step 2: $149 - 50 = 99$

Step 3: $99 - 7 = 92$

9. $607 - 397$

Step 1: $607 - 300 = 307$

Step 2: $307 - 90 = 217$

Step 3: $217 - 7 = 210$

10. $819 - 622$

Step 1: $819 - 600 = 219$

Step 2: $219 - 20 = 199$

Step 3: $199 - 2 = 197$

11. $627 - 392$

Step 1: $627 - 300 = 327$

Step 2: $327 - 90 = 237$

Step 3: $237 - 2 = 235$

12. $586 - 487$

Step 1: $586 - 400 = 186$

Step 2: $186 - 80 = 106$

Step 3: $106 - 7 = 99$

13. $959 - 743$

Step 1: $959 - 700 = 259$

Step 2: $259 - 40 = 219$

Step 3: $219 - 3 = 216$

14. $931 - 491$

Step 1: $931 - 400 = 531$

Step 2: $531 - 90 = 441$

Step 3: $441 - 1 = 440$

15. $573 - 129$

Step 1: $573 - 100 = 473$

Step 2: $473 - 20 = 453$

Step 3: $453 - 9 = 444$

16. $672 - 419$

Step 1: $672 - 400 = 272$

Step 2: $272 - 10 = 262$

Step 3: $262 - 9 = 253$

17. $562 - 487$

Step 1: $562 - 400 = 162$

Step 2: $162 - 80 = 82$

Step 3: $82 - 7 = 75$

18. $486 - 381$

Step 1: $486 - 300 = 186$

Step 2: $186 - 80 = 106$

Step 3: $106 - 1 = 105$

19. $814 - 752$

Step 1: $814 - 700 = 114$

Step 2: $114 - 50 = 64$

Step 3: $64 - 2 = 62$

20. $946 - 297$

Step 1: $946 - 200 = 746$

Step 2: $746 - 90 = 656$

Step 3: $656 - 7 = 649$
