READING

H. Read the text and answer the exercises. _____/10

Emergency situations

If you had an emergency, would you know what to do? Read this guide and learn how to respond in two real-life emergency situations.

Megan

"My friend Ellie and I were sitting on the sofa and watching a movie at my house. Ellie was eating a chocolate cookie when she started to cough. She couldn't say anything. I got her some water, but it didn't help. Then I saw that she had a rash on her face. It was very scary. I didn't know how to help Ellie, so I called 911 and an ambulance came to take her to the hospital. Later, I learned Ellie can't eat nuts—she has an allergy. She's known about this for a long time. But we didn't know that there were nuts in the cookies that we were eating."

What the experts say ...

Megan did the right thing to call 911 because Ellie was having a very bad reaction and her life was in danger. But most allergies aren't as bad as Ellie's. Some people feel sick or get a headache or a stomach ache, for example. If someone has a small reaction to something for the first time, they should talk to their doctor.

Conor

"It was a beautiful day last summer. My friends and I were at the skate park. Jack was riding his new skateboard when he fell and broke his arm. He wasn't wearing a helmet, so he hurt his head, too. He was talking, but he was very confused. He didn't know his name! We were very worried. Jack's mom is a nurse, so we called her at work. She told us we shouldn't move him. She came to the park and took him back to the hospital. He was fine in the end, but it was very scary!"

What the experts say ...

Jack was very lucky in this situation. You should always wear a helmet while you're skateboarding or riding a bike. If everybody wore a helmet, they wouldn't hurt their heads.

If someone hits their head, they may feel dizzy or confused. This is called "concussion," and it is serious. They should go to the doctor if they don't feel better after a few days. If they hit their head and can't wake up, you will need to call an ambulance.

If you think someone has broken their arm, ask an adult to take them to hospital. They shouldn't move it because they might hurt their arm even more.

Find a word that means ...

1. making a noise in your throat. _____
2. a medical problem that some people have when they eat or touch something. _____
3. an object with four wheels that you play with out of the house. _____
4. something that protects your head. _____
5. a feeling when you aren't sure about something. _____

Answer the questions.

1. Where were Ellie and Megan sitting when the medical emergency happened?

2. What happened to Ellie's face?

3. What can't Ellie eat?

4. What was Jack doing when he broke his arm?

5. How did Conor know that Jack was confused?
