21. A. guides	B. rumors	C. limitations	D. responses
22. A. interrupt	B. repeat	C. abandon	D. assemble

IV. Read the following leaflet promoting Recycling. Decide whether the statements from 23 to 26 are True or False and choose the correct answer (A, B, C or D) to complete the statements in the questions 27 and 28. (1.5 pts)

♻ RECYCLING: A SMART WAY TO PROTECT OUR PLANET

A Global Responsibility That Needs Our Action

Recycling is one of the simplest yet most powerful ways to protect the environment. It is more than just separating trash; it is a smart system that turns waste into useful materials again. For decades, recycling has played a major role in saving natural resources, reducing pollution, and cutting energy use. Today, it has become an essential part of modern life and our shared responsibility to the Earth.

THE THREE KEY STEPS OF RECYCLING

Discover the important teamwork behind the recycling process:

LIVEWORKSHEETS

1. Sorting (You – the First Protector):

You are the heart of the recycling chain. By separating paper, plastic, metal, and glass correctly, you help ensure each item can be reused safely and efficiently.

2. Collecting (The Recycling Team):

Workers and collection services gather recyclable items and transport them to recycling centers. Their role is crucial in keeping materials clean, organized, and ready for processing.

3. Processing (The Recycling Plant):

This is where the magic happens. Machines break down recyclables and transform them into new materials. These materials are then used to create new bottles, paper, packaging, and even furniture

WHY YOU MUST START RECYCLING

• Environmental protection: Reduce landfill waste and help keep oceans, rivers, and forests clean.

• Energy saving: Producing recycled materials requires far less energy than making new ones.

• Resource conservation: Every bottle and can recycled helps save trees, minerals, and fossil fuels.

• Direct impact: Your small daily choices like sorting waste or reusing a bottle make a real and immediate difference to the planet.

23. Recycling is described as a smart system that turns old waste into useful materials again.

24. The collecting step in recycling involves machines breaking down materials at the recycling plant.

25. Sorting your waste correctly helps ensure that each recyclable item can be reused safely and efficiently.

26. One benefit of recycling is that it reduces the amount of energy needed to produce new materials.

27. According to the passage, what important role do collection workers play in the recycling process?

A. They gather recyclable items and keep them clean, organized, and ready for processing.

B. They decide which materials should be burned instead of being recycled at plants.

C. They separate materials into new products without needing any machines at all.

D. They create new packaging and furniture directly from recycled waste at home.

28. What can be inferred about the role of individuals in recycling?

A. They decide which items factories should turn into new products.

B. Their actions are not important because machines do everything automatically.

C. They only help after materials are processed at recycling plants.

D. Their correct sorting is necessary for the whole recycling system to work.

V. Use the correct form of the word given in each sentence. (1.5 pts)

29. Her parents were very _____, allowing her to stay out late without asking many questions. **(PERMIT)**

30. The storm left behind massive _____ that shocked the entire region. **(DESTROY)**

LIVEWORKSHEETS
