Science and Tecnology

Drag and Drop to complete the definitions:

Scientific Method **Design Process**

_____: A set of steps for developing products and processes that solve problems.

_____: The process of objectively setting up facts through testing and experimentation.

Scientific Method	
Experimentation	1.
Conclusion	2.
Question	3.
Observation	4.
Evaluation (result)	5.
Hypothesis	6.

Design Process	
Choose one solution	1.
Do research	2.
Evaluate and communicate results	3.
Identify the problem	4.
Make models and prototypes	5.
Develop possible solutions	6.
