### Movies

I guess science fiction is my favourite kind of movies. Those movies seem creative and exciting to me. Although there are some strange science fiction movies out there! But they are funny, sometimes!

I do enjoy horror movies, though. I realise they all have the same idea, but I still find them entertaining. I often watch them with friends, and we try to guess what is going to happen and talk about how the awful makeup and special effects were done, this is interesting. I don't feel afraid watching the horror movies anymore, as I once did.

I used to love action films, but I don't think modern action films are as good as the ones in the past. They used to film them in amazing locations. Nowadays, they are often filmed inside the studios with lots of computer graphics because of low money plans. They just aren't as exciting as they were.

I don't watch documentaries very often. I guess I'm not interested in learning in the nights. I want to relax. Also, a lot of documentaries have important information but

they make you feel sad because they inform you of everything negative that happens in the world. They aren't very enjoyable for me.

Finally, musicals movies! I hate them! I can't understand why people are talking and then they start singing! Of course, musicals aren't very popular now, and that's a good thing! However, some people enjoy them like my wife, she prefers to watch the movies with her friends, and they keep singing along together. Lucky me! I don't have to watch!
