

1. READING COMPREHENSION

“My name is William Smith, and I’m the head porter in this hospital. What do I do? Well, I help run the place. Porters do more than just push food trolleys around the hospital. We transport patients in wheelchairs or on stretchers from the wards to radiology, physiotherapy, and back again.

We remove dead bodies to the mortuary. We lift and carry heavy equipment and furniture. We dispose of all the waste. Each hospital bed produces 4.5 kilos of waste every day. We collect it daily and take it to the recycling centre.

We also deliver the post throughout the hospital and bring letters to patients. That is very important. As we move around the hospital, we take files, samples, and specimens from one department to another.

Last year, I walked 1,800 kilometres in this hospital. To do all these tasks, a porter must be fit, able to think clearly in emergencies, and polite and friendly.

Next time you are waiting for a porter to answer your call, please be patient. He will be with you as soon as he can.”

A. VOCABULARY

Words		Meanings
1. Porter		a. people who are receiving medical care
2. Stretchers		b. a person who transports patients and materials
3. Waste		c. objects used to carry patients lying down
