Going underground!

New York is planning a new park - underground!

Space is limited – especially in cities like New York where an ongoing

1 means that any spare land is quickly turned into an
 2 Too little attention is given to spaces where people
 relax away from city life and escape the fumes and noise from the
 3 that block the city streets every day. But now 4
 in New York have come up with a vision for a new 5 that will
 be underground. Natural light will be reflected down into the space but
 when 6 mean there's too much cloud on top, there's a backup
 LED system for down below. The park will also contain lush green plants
 and a 7 for children to enjoy the safe, clean space away from
 city streets. But what about the rats? Apparently, a good system of rubbish
 removal and cleaning will keep them away!
