

3. The diagram shows a slice of cake, cut from a large cylindrical shaped cake. The cake is of radius 10.5 cm and thickness of 3 cm. The cross-section of the slice is a sector of a circle making an angle of 60° at the centre.

NOT TO SCALE

Taking $\pi = \frac{22}{7}$, calculate the volume of the slice of cake.

[3]

Area of Sector = m^2

Area of Slice = m^3

3.

The diagram shows the graph of the two lines $y = x + 1$ and $y = 1 - x$.

- (a) **Sketch** a copy of the diagram and label the graph of each line with its correct equation. [2]
- (b) On your diagram, shade the region for which the following three inequalities are satisfied.

$$\begin{cases} y \geq 0 \\ y \leq x + 1 \\ y \geq 1 - x \end{cases}$$

[3]

Option A

Option B

Option C

Option D

3. A straight-line graph passes through the points $(-6,1)$ and $(0,5)$.

(a) Calculate the slope (gradient) of this line.

[2]

Vertical Movement =

Horizontal Movement =

Slope =

(b) Write down an equation for the graph of this line.

[1]

y = x +

3. Given the matrix operation below, find the values of a , b and c .

$$\begin{pmatrix} 3 & a \\ 2c & 7 \end{pmatrix} - \begin{pmatrix} 4 & 1 \\ c & -3 \end{pmatrix} = \begin{pmatrix} -1 & 5 \\ -8 & b \end{pmatrix}$$

[3]

Equation involving a

=

a =

Equation involving b

=

b =

Equation involving c

=

c =

3. Matrix A is defined as $A = \begin{pmatrix} 4 & 6 \\ 3 & 5 \end{pmatrix}$.

Find the following.

(a) A^2 $\begin{pmatrix} \boxed{} & \boxed{} \\ \boxed{} & \boxed{} \end{pmatrix}$

[3]

(b) A^{-1} $\begin{pmatrix} \boxed{} & \boxed{} \\ \boxed{} & \boxed{} \end{pmatrix}$

[3]

3. Given that $\overrightarrow{PQ} = \begin{pmatrix} -3 \\ 6 \end{pmatrix}$ and $\overrightarrow{RQ} = \begin{pmatrix} 5 \\ -9 \end{pmatrix}$, find $|\overrightarrow{PR}|$. [4]

Vertical Movement =

Horizontal Movement =

Magnitude =

3. (a) Find the values of x and y given the operation $\begin{pmatrix} 2 & 3 \\ y & -2 \end{pmatrix} \begin{pmatrix} 1 \\ -4 \end{pmatrix} = \begin{pmatrix} x \\ 2 \end{pmatrix}$. [4]

Row 1 by Column 1 Equation

=

x =

Row 2 by Column 1 Equation

=

y =

- (b) If the matrix $\begin{pmatrix} 4 & n \\ -1 & 1 \end{pmatrix}$ has a determinant of 10, find the value of n . [2]

Determinant Formula

= 10

n =
