### School Camping Trip

I just got home from a school camping trip. We took the bus to the camping site in the forest. It was so beautiful! There was a lake with some big rocks next to it. We set up our tents on the ground next to the lake after we had lunch. Before we went for a walk, I put water and food in my backpack.

There were so many insects in the forest. We got bites on our arms and legs. After the walk, we made a fire and cooked dinner. Richard burned his finger. Before it got dark, I washed my face and put on my pajamas. Then we heard a strange sound. What kind of creatures was it? I thought it was a bear! We got our flashlights and looked. It was just a horse!

## Amazing Animals

Seahorses are a type of fish and are called seahorses because of the shape of their heads. Seahorses live in oceans around the world. They live in warm and cool ocean water but not in deep water.

Small seahorses can be around 2 cm long and big seahorses can be up to 35 cm long. They are colorful animals. They are often orange, yellow, green and brown. Others can be pink, purple, and blue. Their colors can change. How cool is that?

Seahorses have small fins that they use to swim. They rest and hide by holding on to seaweed and rocks with their tails. Seahorses do not have any teeth. They use their long mouths to suck up very small animals. Seahorses can eat about 3,000 tiny creatures in one day. They are one of the most amazing animals in the ocean!

1. Why are they called seahorses?
2. Where the seahorses live?
3. How long the seahorses can be?

4. How many color seahorses can be? Mention all of them!

5. How do the seahorses eat?

Good luck 😊
