

Exercise 1: Reading and listening.

THE EVOLUTION OF POP MUSIC (1980s–2020s)

Pop music has changed a lot since the 1980s. During that decade, artists such as Michael Jackson and Madonna became global superstars. Michael Jackson released famous songs like Thriller and Billie Jean. Many teenagers studied his dance moves and tried to copy them. Fans often sweated while dancing to his energetic performances.

In the 1990s, pop music continued to grow. Artists such as Britney Spears and groups like Backstreet Boys dominated the charts. Young people talked about music every day and collected CDs. Many fans swore that these artists were the best performers of their generation.

During the 2000s, technology changed the music industry. People began downloading songs and using digital music players. Artists such as Justin Timberlake and Beyoncé achieved great success. Beyoncé taught millions of fans that hard work and talent could help them survive in a competitive industry.

In the 2010s and early 2020s, streaming platforms transformed music listening habits. Artists such as Taylor Swift and Ed Sheeran have released many successful songs. Taylor Swift has broken numerous records, and millions of listeners have followed her career. Social media is connecting artists directly with their fans.

Today, many teenagers are listening to music on their phones. Some are studying the history of pop music and thinking about how it has evolved. Music styles continue to swing between different trends. Artists must strive to remain popular, and they may have to take risks to create something new.

In the future, technology will continue to influence music. Artists will be creating songs with new digital tools, and fans will be discovering music in different ways. Some musicians might even use artificial intelligence. If pop music continues to evolve, future generations will enjoy even more creative sounds and experiences.

EXERCISE 2: Reading Comprehension)
