

Complementary Angles of Trigonometry

Drag correct option into the box

1 $\sin(90^\circ - \theta)$ -

2 $\cos(90^\circ - \theta)$ -

3 $\tan(90^\circ - \theta)$ -

4 $\cot(90^\circ - \theta)$ -

5 $\sec(90^\circ - \theta)$ -

6 $\operatorname{cosec}(90^\circ - \theta)$ -

DRAG FROM HERE

$\operatorname{cosec} \theta$

$\cot \theta$

$\sin \theta$

$\sec \theta$

$\cos \theta$

$\tan \theta$

When two angles add up to 90° , they are **complementary!**
