Hi Jayden,

I've got lots of news to tell you. We have a new science teacher at school. His name is Mr Jones. He makes science really fun!

Yesterday, we did some experiments with different liquids. We boiled them and then cooled them. It was fun, and I learned a lot. When you cool water to zero degrees Celsius, it freezes. We made ice. If water boils, it turns into a gas. It's interesting, isn't it?

Then we did another experiment to show how ice melts when you add salt to it. We filled some plastic gloves with water and put them in the freezer. The next day, we used cold water to remove the gloves and we had frozen hands! We put the frozen hands in bowls and then added salt. The hands melted really quickly! It was amazing. I wanted to carry on doing experiments all day!

Do you fancy coming to my house on Saturday? We could go mountain biking with my brother.

Call me later and let me know, please.
