

Speaking task (Part 3).

Discuss with your partner the preventive measures that students should take in order to keep themselves safe from Covid-19.

A : _____ (greet). _____
_____ (introduce the topic). Personally,
I think students should wear their masks to prevent themselves from getting infected
with Covid-19. A mask will prevent the droplets from entering your nose or mouth
when an infected person cough or sneeze. _____
(pass the question to your partner)

B : _____ (agree / disagree). A mask will certainly
protect us and the people around us because we don't know who has the virus as he or
she is asymptomatic. This is also why the government has made it mandatory for
everyone to be wearing his or her mask when he or she is in public area and school is
an example of public area.

A : _____ (interrupt). _____
_____ (touch on the point of social distancing)
to prevent people who are infected with this novel coronavirus from sneezing or
coughing onto our face.

B : _____ (agree / disagree). This method doesn't
work for certain sports like basketball, football, futsal and other contact sports. Hence,
_____ (touch on the point of
checking your body temperature). Students who are having fever of 37.5 Celcius and
above shouldn't be allowed to enter the school.

A : _____ (agree / disagree). Students cannot avoid
crowded areas and school is also a crowded area because no matter where we are, life
has to go on and we should practise the new norm and students who are sick should
stay at home.

B : _____ (agree / disagree). If they are having fever
because of the virus we don't want them to be spreading the virus. Unfortunately,
some people are asymptomatic even though they are infected so _____
_____ (talk about hand hygiene). We should wash our
hands regularly with soap or use hand sanitiser if we can't find the tap water and soap
nearby. This is to prevent the spread of the virus if we were to touch any surface
contaminated with the virus.

A : _____ (conclude) all of the
above should be done to keep us and our loved ones safe.
