I hope we never have flying cars of any kind. I think even flying ambulances are a bad idea. Why? Well, first of all, if everyone is flying cars in the sky, we'll have traffic jams in the air! And imagine a car accident in the air – flying car parts might fall onto people on the ground. People in the flying cars might even fall out!

Second, we already have a lot of air pollution. I think that flying cars would create more of it. The air in big cities would be horrible.

Third, cars break down all the time. When your car breaks down, you just pull over to the side of the road. What will you do if your car breaks down in the air? Your car would probably just fall to the ground. That might destroy your car and even hurt someone else ... or worse.

I definitely don't think we should have flying cars. Let's find other ways to get ambulances to people more quickly.
