

Read the email from your sister, Zara.

Hi,

My examination is next week, but I cannot decide the best way to prepare for it. Should I make a study timetable, do more practice exercises, or study with my friends?

What do you think?

Daniel

I truly hope this app could also help you improve your studies and enjoy learning every day.

Fatima

Hello Zara,

Besides that, you can practise different subjects anytime and anywhere as long as you have a stable internet connection, you're good to go.

Not only that, but you can also check your answers immediately and learn from your mistakes.

Talk to you again soon.

Among all the educational apps I have used, so far, I think Liveworksheets is one of the best for students.

Take care,

I couldn't be happier to hear from you.

In my opinion, it provides many interactive exercises that make learning more interesting, like grammar, reading and writing.
