Read the following passage and mark the letter A, B, C, or D on your answer sheet to indicate the correct answer to each of the following questions from 21 to 26.

English is often called the international language of science. Many important inventions and discoveries around the world are shared in English. Over time, English has become a useful tool that helps people understand science better. It also helps connect scientists from different countries.

In science, using English **enables** people like inventors, explorers, and researchers to work together. It helps them think of new ideas and share their findings. Because they all use one language, they can understand each other more easily and make progress faster.

English is also used to write about discoveries so people can read and learn. Many books about science and exploration were first written in other languages. But when they are translated into English, they can reach **the masses**. For example, books about Newton's law of gravity or Edison's inventions like the light bulb have helped many people learn about science.

Without English, science might not grow as fast. Can another language take its place? Or could someone invent a better one? Until then, English remains a key to sharing knowledge worldwide.

Question 21. Which statement is **TRUE** according to the text?
A. All scientific research must be written in English.
B. Translating books into English slows down scientific progress.
C. Isaac Newton wrote his discoveries in English to reach the masses.
D. English makes it easier for people to access scientific discoveries.
Question 22. Which detail is NOT mentioned in the text?
A. Learning English is required for scientific careers.
B. English helps document important discoveries.
C. Scientific publications expand human knowledge.
D. Translating books into English makes them accessible to many people.

LIVEWORKSHEETS

Question 23. Why is English important for scientific communication?
A. It reduces the cost of scientific publications.
B. It helps scientists collaborate and share ideas globally.
C. It simplifies the process of writing books.
D. It guarantees that discoveries will not be forgotten.
Question 24. What is the **CLOSEST** meaning to the phrase "the masses" in paragraph 3?
A. Only English-speaking communities.
B. A large number of people.
