

Wild Animals Can Do Amazing Things

Wild animals can do many amazing things. Every animal has special abilities.

Lions can run very fast, but they can't climb trees very well. Monkeys can climb trees and jump from branch to branch. They can also eat fruit and play together.

Elephants are very big. They can carry heavy things and use their trunks to drink water. Giraffes can eat leaves from very tall trees because they have long necks. Eagles can fly high in the sky and see very well. Dolphins can swim fast and jump out of the water.

Wild animals are important. They can help nature, and we can help them too. We can protect their homes, keep forests clean, and never hurt animals. Together, we can take care of wildlife.

A. Choose the correct answer.

1. What can lions do?

- a) Fly
- b) Run very fast
- c) Swim

2. Which animal can climb trees and jump from branch to branch?

- a) Elephant
