Pollutions

Name: _____ Class: _____ No.: _____

Date: _____ / _____ / _____

A. Reading

Pollution is one of the biggest environmental problems in the world.

There are many kinds of pollution, such as air, water, land, and noise pollution.

Air pollution comes from cars, factories, and burning waste.

Water pollution happens when people throw garbage and chemicals into rivers and seas.

Land pollution is caused by too much plastic and other waste.

Pollution can harm people, animals, and plants.

It can also cause climate change and many diseases.

Everyone should reduce, reuse, and recycle to protect the environment.

People should plant more trees and use less plastic every day.

If we work together, we can make our world cleaner and healthier.
