# Reading Activity

## My Future Plans

My name is Mateo and I am 16 years old. I am in my last year of high school, and I am thinking a lot about my future. I have many plans and dreams that I want to achieve.

Next year, I am going to finish high school, and after that, I am going to study engineering at university. I like technology and problem-solving, so I think it is a good career for me. I am also going to improve my English because I want to work in an international company in the future.

Tomorrow, I am going to meet my school counselor to talk about universities. Next weekend, I am going to visit a university with my parents. I am a little nervous, but I am also excited.

In the future, I will travel to different countries and learn about new cultures. I think technology will change many jobs, and people will work more online. Soon, I will start preparing for my exams, so I need to study a lot. I know my future will be challenging, but I am ready to work hard and achieve my goals.

**MULTIPLE CHOICE. Choose the correct answer.**

**1. What is Mateo going to study at university?**
