True / False / Not Given

Exercise 7

Answer Key p.221

Does the following statement agree with the information given in Passage 7?

Write:

TRUE	*if the statement agrees with the information in the passage*
FALSE	*if the statement contradicts the information in the passage*
NOT GIVEN	*if there is no information on this in the passage*

Passage 7

Acne is a common problem usually experienced by teenagers and also experienced by many adults. Acne frequently occurs on the face and neck area, but it can also occur on the chest and back. It causes the appearance of pimples, which can leave scars and dark spots. This can detract from a person's appearance, which is why many people use acne treatments. Some people use oral medicines and antibacterial creams. However, not many people can afford these, which is why they prefer home remedies. Lemon, orange, banana and carrot are only some of the natural remedies people can use at home to help treat acne.

Question

In treating acne, most individuals choose to use home remedies because they are the quickest means to get rid of pimple marks.

Approach

STEP 1 Identify the keywords in the statement question.

STEP 2 Find out the ideas related to those keywords in the passage.

STEP 3 Decide whether the statement is TRUE (T), FALSE (F), or NOT GIVEN (NG).

Exercise 8

Answer Key p.221

Does the following statement agree with the information given in Passage 8?

Write:

TRUE	*if the statement agrees with the information in the passage*
FALSE	*if the statement contradicts the information in the passage*
NOT GIVEN	*if there is no information on this in the passage*

Passage 8

A meteor is also called a falling star or a shooting star. People can see a falling star when a small particle from outer space enters the Earth's atmosphere. The impact between the particle and the Earth's atmosphere causes the particle to become very hot. Due to the very high temperature during impact, the particle is set ablaze and will look like it is glowing. Yet, a meteor does not actually land on the Earth's surface because it dissolves into dust. Particles that do land on Earth, however, are called meteorites.

Question

A meteor becomes incredibly hot when it crashes into the Earth's atmosphere.

Approach

STEP 1 Identify the keywords in the statement question.

STEP 2 Find out the ideas related to those keywords in the passage.

STEP 3 Decide whether the statement is TRUE (T), FALSE (F), or NOT GIVEN (NG).
