Safety on safari

Do you want to see lions and elephants, buffalo and crocodiles, and many other wild animals? For 35 years *Go Botswana* have provided expert safari holidays. All safaris have an element of danger. That's what makes them fun! But do you know what the real dangers are?

Hippos

Hippos are the second largest animal in Africa – only the elephant is bigger. The males weigh as much as three small cars! Hippos are also the most dangerous land animal you will meet on safari. That might sound surprising because most people think hippos are slow and lazy. But if you saw a hippo get angry, you'd soon change your mind. They can run very fast and they have very big teeth. In fact, they killed around 500 people across Africa last year. During the hot African day, hippos need to keep cool. They spend almost all day asleep in rivers and lakes. It isn't a good idea to

go swimming while you're on safari. We also suggest that you don't walk on the lake beaches at night, as this is when hippos are awake.

Safety tips

If all safari tourists followed these simple rules, the number of people hurt by animals each year would go down.

- Stay in your vehicle. If you see an interesting animal, do not get out of your safari vehicle to take a picture. It's not a good idea to see how close you can get to a lion. Our drivers will get you to the closest and safest possible location.
- Don't wave at the animals. Animals can become aggressive if people wave their hands or other objects at them. Remember, humans are dangerous too – it's a good idea for these animals to be afraid of us.
- If you meet an animal that seems nervous, stay quiet and walk backwards to get away.
- Always wear walking boots and long socks. You will be walking in long grass and also on the beaches around our lake areas. Wearing the correct shoes will protect you from snakes, scorpions and biting spiders.
