First, you need a lot of sleep. How many hours do you sleep each night? It's a good idea to sleep at least 7 hours every night. Go to bed early, and don't stay up late watching TV!

2

Then, in the morning, get up early. You can't feel relaxed when you haven't got much time, so don't stay in bed. Do some exercise before breakfast. Try doing some yoga, or just stretch your body.

3

Next, eat a healthy breakfast. Breakfast is important, and it's good to eat a lot of fruit, cereal and yoghurt, perhaps with some orange juice. But don't eat much meat, and don't eat many sweet things like chocolate.

4

Finally, make a lunchbox with a lot of healthy food in it. Take it with you when you go to work or school. Make sure there are some healthy snacks, like fruit or pieces of vegetables, and eat those when you feel hungry in the middle of the morning.
