

Name: _____

Score: ____/ 19

QUICK CHECK – 10.08.2026**Exercise 1: Complete the flowchart, using NO MORE THAN TWO WORDS in the passage**

The production of fuel-ethanol or 'grain spirit' from grain is relatively straightforward. It is made from harvested crops. As the demand for alternative 'clean' fuels increases, farmers are switching for planting crops for consumption to fuel crops like corn, barley, wheat, or others that produce oil like palm oil and rapeseed. The growing process is no different from that of any crop. A farmer simply plants a field of corn, which is then harvested. Instead of being taken to a mill to produce flour, the corn is delivered by lorry to a distillery where it goes through four main stages before it can be used as fuel. First, during a preparation phase, the grain is ground then cooked prior to the fermentation process commencing. Then, before the distillation of the liquid to produce the ethanol takes place, solid matter has to be removed by filtration. At a fuel-ethanol plant, the blending of ethanol and petroleum is carried out to produce E-10, a mix of 10 per cent ethanol and 90 per cent petroleum, or E-15, which is 15 per cent ethanol and 85 per cent petroleum. The liquid is then put into storage, and the distribution process is ready to begin.

**Exercise 2: Write the English words/phrases or Vietnamese meanings.**

No.	English	Vietnamese	No.	English	Vietnamese
1	shoplifting (n)		6	(n)	chủ thể
2	stimulate (v)		7	browse (v)	
3	(n)	món hời, sự mặc cả	8	verify (v)	
4	sophisticated (adj)		9	(adj)	độc, đắt đỏ
5	(v)	thao túng, điều khiển	10	(n)	tâm lý học
