

Read the passage carefully.

Rani was a curious girl who lived in a village. She often asked questions to her family, teachers and friends. One day, she heard her mother singing a song about the Moon. Rani wondered how far the Moon was.

The next morning, her brother Pratik excitedly called her to look at the TV. He told her that India was on the Moon. Rani saw pictures of machines on the Moon and wanted to know how Chandrayaan reached there.

Pratik told Rani about his friend Vivaan's mother, Nandini Aunty, who was a scientist. Rani and Pratik visited her. Nandini Aunty explained that a rocket is used to reach the Moon. She also told them that Chandrayaan means a vehicle to the Moon. Chandrayaan-3 landed on the Moon on 23 August 2023.

Answer the following questions.

Where did Rani live?

Why was Rani curious?

What did Pratik show Rani on the TV?

Who was Nandini Aunty?

What vehicle is used to reach the Moon?
