3. Read the passage carefully. Write (T) if the sentence is true and (F) if it is false.

Recycling

Recycling is important because we make a lot of rubbish every day. If we recycle things, we can help our planet.

We can recycle many things, such as paper, glass, plastic and cans. We can put them in recycling bins. Then, people can use these things to make new products.

Recycling helps keep our Earth clean. It also helps save trees, water and energy. For example, when we recycle paper, we don't need to cut down as many trees.

There are some easy things we can do at home. We can use a reusable bag when we go shopping. We can turn off the lights when we leave a room. We can also turn off the tap when we brush our teeth.

Let's recycle and look after our planet!

1. Recycling is important because we make a lot of rubbish.

2. We can recycle paper, glass, plastic and cans.

LIVEWORKSHEETS
