Shopping with My Parents

I help my parents when we go shopping at the supermarket. I add up the prices of everything they want to buy. When they put something in the shopping cart, I ask them, “*How much is this?*” or “*How much are these?*” I use the calculator on my smartphone to add up the prices of all the groceries we want to buy. When they tell me the prices, I add them together using my smartphone. My father says that spending more than \$200 at the supermarket is too much. So I must tell him if the amount goes over \$200. We go shopping together as a family. We help each other while we are shopping.

- Where does the writer go shopping?
A. Supermarket B. Minimarket C. Indomarket D. Alfamarket
- Who does the writer go shopping with?
