Read the passage and check your understanding by following the instructions to use “Google Translate” application.

The Use of Translate Application

In a globalized world with multilingual society, there are over 6,000 languages spoken in the world today. Knowing other languages can open opportunities for studying or working. For this reason, we sometimes require translating into other languages that can help communicate between people who speak different languages. In an easy way using language translation software makes translating from any applications on your mobile phone.

How to use Google Translate Mobile Application

First, download “Google Translate” on the App Store or Play Store.

Then, open the app and choose the languages you want to translate-- for example, from Japanese to English.

Next, type or paste your text into the white box. You can also import text images for translation from the photo library on your mobile phone into the white box.

Finally, the translated text will appear automatically. If it doesn't, click the blue arrow.

Read these sentences and mark them true (✓) or false (✗).

1. There are more than 6,000 languages spoken and written in the world.
