

COLORS AND DESCRIPTIONS PRACTICE:

These problems will help you learn to use color words in your own writing. Start with the easy ones and work your way up to the harder ones. Use simple colors such as: RED, BLUE, YELLOW, PURPLE, GREEN AND ORANGE.

PROBLEM 1

Look at this sentence: "I have a ball." What color word could you add to make it more interesting? Choose one color that would make sense for a ball.

PROBLEM 2

Fix this sentence by adding one color word: "The cat sat under the umbrella." Pick a good spot to add a color word and choose a color that makes sense.

PROBLEM 3

Here's a story that needs color words: "My mom planted flowers in our garden. She watered them with a hose. Now butterflies come to visit." Add color words to make this story more exciting to read.

PROBLEM 4

Write your own three-sentence story about going to a playground. Use at least three different color words in your story. Make sure each color word comes right before the noun it describes.

PROBLEM 5

Look at these two sentences: "I saw a bird" and "I saw a bright red bird with yellow feet." Explain why the second sentence is better for readers. Then write your own example showing how color words help in writing.
