Read the text and questions below. For each question, choose the correct answer.

Imagine if everyone in your street suddenly came out into the road one day and started singing together. Singing teacher Ruth Black believes it would make everyone so friendly that they would never walk past each other again without saying hello.

Singing helps people live in peace together, she says. All over the world people have always sung together and in most places they still do, but in England, it is no longer traditional. Nowadays, says Ruth, people only sing together in churches and football grounds, although it could be done anywhere. Everyone is able to sing, she says, but most of us either think we can't or have forgotten what we learned as children.

However, as with everything musical, you need to practice and the same applies to your voice. Ruth believes that singing itself brings other benefits. It encourages good breathing, for example. Through singing, people often become more confident and also learn to control stress. But more than anything, it brings people together.

When Ruth first started singing, there was little opportunity to sing with others. Then, through a friend, she discovered an excellent singing class and became so keen that she started running her own classes. These are held twice a month for all singers, whatever their level, and are now enormously successful.

Question 12 (Question ID: 99-191048)

Bees, bees, bees

Most people enjoy seeing bees in gardens and parks, but it can be scary when they're flying together in large numbers, and it can be even more frightening if they come a bit too close!

A few years ago, Lisa Turnbull was in her home in York. She had made a cake, which she had left on the kitchen table. Q12.1..... But, as she opened the window to help the cake cool more quickly, she unfortunately didn't notice the large number of bees flying around in her back garden. Lisa left the cake in the kitchen and went upstairs. A few minutes later, she heard a loud noise coming from her kitchen, so she went back downstairs. Q12.2..... They had left their old home and were looking for a new one. It seems that the queen bee, which controls all the others, had fancied a bit of cake and landed on it. She was followed by 15,000 others! Lisa calmly closed the kitchen door and called a local beekeeper, who removed the bees from her cake. Q12.3.....

Last summer, Jane Norton from Manchester had a similar experience. She was driving home from work when she noticed thousands of insects following her car. Q12.4..... She stopped the car, hoping that they would continue and leave her in peace. However, they landed on it and stayed there. Feeling rather nervous, Jane used her phone to look online and find the phone number of a local beekeeper. Q12.5..... It turned out that the queen bee had flown into the boot of the car while Jane was putting shopping into it. When she closed the boot, the queen was stuck inside, so when she drove off, the rest of the bees followed. Jane stayed in her car until the beekeeper had safely removed all the bees – which took over three hours! That's a good excuse for being late home!
