Homework

Unit 7. How a Frog Grows

The life cycle of a frog has four stages. It begins with an egg.
① She lays up to 4,000 eggs.
② Tadpoles have long tails and look a little like small fish. They have gills so that they can breathe underwater. ③ But tadpoles don't look like fish for long.
After about six weeks, they start growing back legs. ④ Their tails get smaller and their legs get bigger.

[A-D] Complete the sentence. Then add the sentence to the right place.

A. front legs / grow. / Then, / their

_____ ☐

B. They / eat plants / swim around / and / in the pond.

_____ ☐
