

Read the text below. Use the word given in capitals at the end of some of the lines to form a word that fits in the gap **in the same line**.

Agriculture in Australia

Traditionally, Australia was for producing wheat and wool, but times have changed in years, with many farmers to be more diverse in their crop and livestock range. It is now quite common to see farms with more exotic fruit and vegetables. Farmers are to sell their produce locally nowadays, but rather to the factories in the cities. As a result, farms are now large-scale where thousands of tonnes of crops are cultivated. Another aspect that is different nowadays is . In the past, farmers would just flood the fields but now it is common to see sprinkler everywhere. This means that more water is conserved, which has been helpful with the drought that has severely impacted the of the farms in the southern states of the country.
