

MAY or WILL?

Talking about Climate Change

A greener future is in our hands!

Look and read. What can you notice?

The polar ice **may** melt in the future.

Sea levels **will** rise in the next decades.

Some regions **may** face more droughts.

People **will** find new, cleaner energy solutions.

We use **may** to talk about a possible situation.

We use **will** to talk about a prediction or something we are more sure about.

Think!

1. When is **may** used?
What does it show?
2. When is **will** used?
What does it show?

1 Choose the correct option.

Read the sentences and select **may** or **will**.

1. Temperatures _____ increase in the next 50 years.
A) may B) will C) might D) can
2. We _____ have stronger storms in the future.
A) may B) will C) must D) should
3. People _____ need to change their habits to protect the planet.
A) may B) will C) can D) could
4. Some animals _____ lose their habitats.
A) may B) will C) must D) should
5. Scientists believe that sea levels _____ rise significantly.
A) may B) will C) can D) might

2

Read the situation and choose the best answer.

Select the option (A, B, C or D) that best completes each sentence.

1. If we plant more trees, the air _____ be cleaner.
A) may B) will C) can D) might
2. There _____ be less fresh water in some countries.
A) may B) will C) should D) could
3. Scientists _____ discover new ways to fight climate change.
A) may B) will C) must D) can
4. If we keep polluting, the planet _____ become a more dangerous place.
A) may B) will C) could D) can
5. People _____ live in more sustainable cities in the future.
A) may B) will C) might D) should

3 Read the text and answer the questions.

Read the text about climate change. Then, choose the best answer (A, B, C or D).

A Different Tomorrow

Climate change is already affecting our planet. In the future, we will probably see higher temperatures, more extreme weather and rising sea levels. Some places may become too hot or dry to live in. However, there is still hope. People will continue to look for solutions, and new technologies may help us reduce pollution. If we work together, we can build a cleaner and healthier world for future generations.

1. According to the text, what will probably happen in the future?
 - A) Temperatures will decrease.
 - B) There will be more extreme weather.
 - C) Sea levels will stay the same.
 - D) People will stop looking for solutions.
2. What may happen in some places?
 - A) They may become too cold.
 - B) They may become too hot or dry to live in.
 - C) They may have more trees.
 - D) They may have more animals.
3. What is the main idea of the text?
 - A) Climate change is only a problem for some countries.
 - B) There is no solution to climate change.
 - C) The future will be difficult, but there is still hope.
 - D) People will stop using technology.

Let's choose a brighter tomorrow!
