

Unit 1. Time for culture.

Homework

Different people.
Different habits. 😊

Screen time research

1 Do a survey

Ask at least 10 people (friends, classmates, family members – parents, grandparents, etc.). Find out how many hours they spend on:

TV

YouTube

TikTok

Netflix

You can ask:
“How many hours do you usually watch TV / YouTube / TikTok / Netflix in a typical week?”

2 Write the results

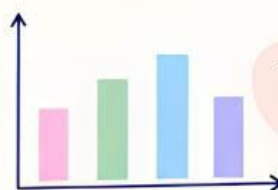

Fill in the table. Write the number of hours (e.g. 1, 2.5, 0.5).

If someone doesn't use it, write 0. You can add more people if you want.

No.	Person (e.g. name)	Age	Age group (kid / teenager / adult / middle-aged / pensioner)	TV (hours)	YouTube (hours)	TikTok (hours)	Netflix (hours)
1							
2							
3							
4							
5							
6							
7							
8							
9							
10							

3 Look at your results

- Which age group spends the most time on each activity?
- Which activity is the most popular overall?
- Are there any surprising results?

I am surprised that ...

4 Write a short conclusion

Write 5–8 sentences about what you found out.

Use some of these phrases:

- In my research, I found that ...
- Most ... spend ... hours on ...
- The most popular activity is ...
- I am surprised that ...
- I expect ... but ...
- People in different age groups ...
- In my opinion, ...
- A typical ... (kid / teenager / adult / middle-aged person / pensioner) ...

Good luck! 😊

Screens are a big part of our lives.
What about yours?

Same screens.
Different generations.
