

The 3Rs at Dongbangwittaya School

Look around our school. Do you see plastic cups, straws, and snack bags on the floor? Rubbish is a big problem for our environment. But we can make Dongbangwittaya School clean and green by using the 3Rs.

First is **Reduce**. We can reduce waste by saying "NO" to plastic bags. We can also use fewer plastic straws when we buy cold drinks.

Second is **Reuse**. We do not need to throw everything away. We can use a glass bottle again and again instead of buying a new plastic bottle every day. We can also reuse old paper for taking notes.

Third is **Recycle**. We cannot reuse everything, so we must recycle. We must put paper, glass, and plastic into the correct bins. Then, they can be made into new things.

The 3Rs are easy. If every student helps, we can make our school a zero-waste school!
