Date: _____

Cut the pictures and sentences. Put them in the correct order of the ship's passage through the Panama Canal.

 The ship sails across Gatún Lake.	 The locks fill with water to raise the ship to the level of Gatún Lake.	 The ship enters the first lock (Atlantic or Pacific).	 The ship leaves the canal and continues its journey.
 The ship arrives at the canal and is guided by tugboats to the entrance.	 The locks are emptied to lower the ship to the level of the other ocean.	 The ship enters the locks on the other side (Pacific or Atlantic).	 The Canal Control Center coordinates and authorizes the ship's passage.
