

Question: 54

CertyIQ

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 E5 subscription.

You create a user named User1.

You need to ensure that User1 can update the status of Identity Secure Score improvement actions.

Solution: You assign the Security Operator role to User1.

Does this meet the goal?

A.Yes

B.No

Question: 55

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 E5 subscription.

You create a user named User1.

You need to ensure that User1 can update the status of Identity Secure Score improvement actions.

Solution: You assign the SharePoint Administrator role to User1.

Does this meet the goal?

A.Yes

B.No

Question: 57

HOTSPOT

-

Your network contains an on-premises Active Directory Domain Services (AD DS) domain that syncs with an Azure AD tenant.

You need to ensure that user authentication always occurs by validating passwords against the AD DS domain. What should you configure, and what should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Configure:

- Azure AD Password protection
- Cross-tenant synchronization
- Pass-through authentication
- Password hash synchronization

Use:

- Azure AD Connect
- Microsoft Identity Manager (MIM)
- The Microsoft Entra admin center
- The Microsoft Purview compliance portal

Question: 60

CertyIQ

HOTSPOT

Your network contains an on-premises Active Directory Domain Services (AD DS) domain that syncs with Azure AD and contains the users shown in the following table.

Name	Organizational unit (OU)
User1	OU1
User2	OU2

In Azure AD Connect, Domain/OU Filtering is configured as shown in the following exhibit.

Azure AD Connect is configured as shown in the following exhibit.

The screenshot shows the 'Microsoft Azure Active Directory Connect' window. The left sidebar contains a list of steps: Welcome, Express Settings, Required Components, User Sign-In, Connect to Azure AD, Sync, Connect Directories, Azure AD sign-in, Domain/OU Filtering, Identifying users, Filtering, Optional Features, and **Configure**. The main area is titled 'Ready to configure' and lists the actions that will be performed upon installation. It includes a bulleted list of configuration tasks and two checkboxes for synchronization settings.

Ready to configure

Once you click Install, we will do the following:

- Configure synchronization services on this computer
- Install Microsoft Azure AD Connect Authentication Agent for Pass-Through Authentication
- Enable Pass-through authentication
- Configure Source Anchor Attribute
- Configure sk220630outlook.onmicrosoft.com - AAD Connector
- Configure contoso.com Connector
- Disable Password hash synchronization
- Enable Password writeback
- Enable Azure AD Export Deletion Threshold (500)

☒ Start the synchronization process when configuration completes.

☐ Enable staging mode: When selected, synchronization will not export any data to AD or Azure AD.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
User1 can use self-service password reset (SSPR) to reset his password.	☐	☐
If User1 accesses Microsoft Exchange Online, he will be authenticated by an on-premises domain controller.	☐	☐
User2 can be added to a Microsoft SharePoint Online site as a member.	☐	☐

Question: 64

CertyIQ

HOTSPOT

-

You have an Azure AD tenant.

You need to configure the following External Identities features:

- B2B collaboration
- Monthly active users (MAU)-based pricing

Which two settings should you configure? To answer, select the settings in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

External Identities

Contoso Ltd - Azure Active Directory

Question: 69**HOTSPOT**

Your network contains an on-premises Active Directory Domain Services (AD DS) domain named fabrikam.com. The domain contains an Active Directory Federation Services (AD FS) instance and a member server named Server1 that runs Windows Server. The domain contains the users shown in the following table.

Name	Description
User1	The user account has a six-character password and is enabled.
User2	The user account has a 12-character password and is enabled.
User3	The user account has an eight-character password and is disabled.

You have a Microsoft Entra tenant named contoso.com that is linked to a Microsoft 365 subscription. You establish federation between fabrikam.com and contoso.com by using a Microsoft Entra Connect instance that is configured as shown in the following exhibit.

The screenshot shows the 'Optional features' section of the Microsoft Azure Active Directory Connect setup. On the left is a sidebar with links: 'Welcome', 'Express Settings', 'Required Components', and 'User Sign-In'. The main area is titled 'Optional features' and contains the text 'Select enhanced functionality if required by your organization.' Below this text is a checkbox labeled 'Exchange hybrid deployment' which is currently unchecked. A blue question mark icon is located to the right of the checkbox label.

password and is disabled.

You have a Microsoft Entra tenant named contoso.com that is linked to a Microsoft 365 subscription. You establish federation between fabrikam.com and contoso.com by using a Microsoft Entra Connect instance that is configured as shown in the following exhibit.

The screenshot shows the 'Optional features' configuration window in Microsoft Azure Active Directory Connect. The window has a dark title bar with the text 'Microsoft Azure Active Directory Connect'. On the left is a navigation pane with a blue header 'Optional Features' and several menu items: 'Welcome', 'Express Settings', 'Required Components', 'User Sign-In', 'Connect to Azure AD', 'Sync', 'Connect Directories', 'Azure AD sign-in', 'Domain/OU Filtering', 'Identifying users', 'Filtering', 'Optional Features' (highlighted), 'Credentials', 'AD FS Farm', 'Azure AD domain', 'Configure', and 'Verify connectivity'. The main area is titled 'Optional features' and contains the instruction 'Select enhanced functionality if required by your organization.' Below this are several checkboxes: 'Exchange hybrid deployment' (unchecked), 'Exchange Mail Public Folders' (unchecked), 'Azure AD app and attribute filtering' (unchecked), 'Password hash synchronization' (checked), 'Password writeback' (checked), 'Group writeback' (unchecked with a warning icon), 'Device writeback' (unchecked), and 'Directory extension attribute sync' (unchecked). Each checkbox has a blue question mark icon to its right. At the bottom of the main area is a link: 'Learn more about optional features.' At the bottom of the window are two buttons: 'Previous' (disabled) and 'Next' (active).

Microsoft Azure Active Directory Connect

Optional features

Select enhanced functionality if required by your organization.

- ☐ Exchange hybrid deployment ?
- ☐ Exchange Mail Public Folders ?
- ☐ Azure AD app and attribute filtering ?
- ☒ Password hash synchronization ?
- ☒ Password writeback ?
- ☐ Group writeback ⚠ ?
- ☐ Device writeback ?
- ☐ Directory extension attribute sync ?
